Charles Franklin Emery : Dad, Dog and Fish before purchasing it in order to gage whether or not it would be worth my time, and all praised Dad, Dog and Fish:

0 of 0 people found the following review helpful. Memory LaneBy B. SuedeI purchased this book as research for another project, but when I read it I recognized many things I had in common with the author. He writes about growing up in Southern California and spending recreational time in the Imperial Valley/Salton Sea. I spent my early years living in the desert outside of Niland, and the author made me remember some good things about the place (and there are not many, believe me).The book itself is really a series of short topics on the subject of his dad, his dog,

hunting and fishing. The writing moves in starts and stops, but all in all it was an enjoyable experience. As it was really a collection of loosely related topics, the ending appears without much warning. Things are different in California now, for those of us who grew up there in the 60s, and never again shall we see their like. 1 of 1 people found the following review helpful. Lovely family memoir By Lorraine Janice Lee Wonderful tales memories that the author had of his Dad, his dog his youth. Probably those days are gone for our children, when things were more carefree and relaxed, and you could let your kids run wild down the creek. Same in NZ , we all had this childhood, but I miss the fact my grandchildren have lost this time of innocence. This book will bring back memories for everyone. 0 of 0 people found the following review helpful. Dad, Dog and Fish. By Rachel Stoltzfus The book has some parts to make you laugh and others to cry. I am not a big fan of the style of writing this author has used, but the cars from teen years I can relate to, and since I just lost my dad this year, I can feel the love the author and his father shared. I never did any hunting or fishing, but sounds like the author shared many happy memories with his dad. So to me it is ok. Not good, and not great.

"Dad, Dog and Fish" is a memoir about my life with my Dad and Bunkie, my yellow Labrador Retriever wonder dog. The story begins in 1960's Southern California and ends in a 1723 stone farmhouse in South East Pennsylvania, deep in Amish country. This memoir is the story of the life of a simple man that loved family, life, humor and animals (especially dogs). This memoir is a humorous recount of that life that confronts serious issues as well as philosophical outlooks.
